Developed Projects

[my-repo](#)

Store and search favorite marked Stackoverflow questions&answers [alpha]:

- A GUI tool that allows users to locally (offline) store their “favorite” marked questions and respective answers and comments, from Stackoverflow.
- This attempts to solve the “I wish I had stored this solution for later” problem, by giving developers the opportunity to store the solutions locally on their machine when there is no internet access.
- Consumes Stackoverflow API.
- Headless browser is created with Selenium package, to generate and extract access-token for stateless communication (oAuth2).
- GUI is to yet to be implemented, but it will be based on PyQt.
- Written in Python.

[protonvpn-linux-gui](#)

GUI tool for ProtonVPN customers, built for Linux platform [beta]:

- A tool that improves UX for customers of ProtonVPN, since at the moment they only offer CLI.
- Simple and user-friendly GUI, built with Glade.
- Based on ProtonVPN’s own cli code, written in Python.
- Available at PyPi as: [protonvpn-linux-gui-calexandru2018](#)

[calexandru.com](#)

Web-portfolio:

- Personal web-portfolio
- Developed with Vue.js

LK Properties

- No back-end

Rent, buy or sell your real-estate:

- The webpage has the goal of facilitating the rental and sale of real estate.
- I had personally conducted several interviews to get project requirements.
- Developed both the front and back end of the page.

Bom ao Quadrado

Find our foodtruck:

- The webpage aims to facilitate the location of the offered services and the presentation of their products.
- I conducted several interviews to get the project requirements.
- Developed both front and back end. The front end was developed with JS ES6 for greater flexibility, a trans-compiler was used to convert to JS ES5.
